

Polar electroceramics

Project reference: G5RT-CT-2001-05024

Funded under: FP5-GROWTH

Polar electroceramics

From 2001-04-01 **to** 2007-03-31

Project details

Total cost:

EUR 2 280 029

EU contribution:

EUR 2 215 085

Coordinated in:

Denmark

Subprogramme:

1.1.3.-5. - RTD Activities of a Generic Nature : materials and their technologies for production and transformation and new and improved materials and production technologies in the steel field

Funding scheme:

THN - Thematic network contracts

Objective

The aim of Polecer is to identify key areas for development within polar electroceramics, coordinate R&D activities in the field, pursue efficient dissemination of their results to industrial users, support implementation of emerging technologies leading to new products, to bring Europe to the forefront of technological development and strengthen its competitiveness by means of innovative products and setting environmental standards. Polecer will organize and support co-operation between European regions including the former Eastern Europe and stimulate exchange of young scientists from different countries. Polecer will organise annual workshops to ensure information flow and dissemination of results and 5 focused workshops to create a common platform for scientists and industrial users to facilitate the co-operation and fast implementation of results. It will organize a database of expertise and a database of host institutions.
